Assembly #

Car towed in after hours by towing company contracted by owner.

Owner states they ran over a large rock in the road and lost fluids, oil and shut the car down and pulled over.

Rack vehicle and perform inspection, document with pictures.

Remove undertrays for further inspection of damaged areas.

Remove engine oil pan and inspect for internal engine damage

Test gearbox case for cracks/leaks

Engine oil pan and windage tray will need replacement. Recommend doing this prior to any other repairs and confirm no hidden damage to the engine.

Remove gearbox for access to the rear of the engine, replace rear main cover plate oring that was damaged during engine oil pan removal.

Recenter and self learn F1 system.

Fuel tank smashed in on the underside. Install good used fuel tank.

New are no longer available. Transfer over pumps, sending unit and hoses.

Evaporative pipes will crack upon removal and are quoted on the job.

A/C and P/S lines damaged down center tunnel. Install new steel lines.
